Trademarks

The following are trademarks of the International Business Machines Corporation in the United States, other countries, or both.

Not all common law marks used by IBM are listed on this page. Failure of a mark to appear does not mean that IBM does not use the mark nor does it mean that the product is not actively marketed or is not significant within its relevant market.

Those trademarks followed by ® are registered trademarks of IBM in the United States; all others are trademarks or common law marks of IBM in the United States.

For a complete list of IBM Trademarks, see www.ibm.com/legal/copytrade.shtml:

*, AS/400®, e business (logo)®, DBE, ESCO, eServer, FICON, IBM®, IBM (logo)®, iSeries®, MVS, OS/390®, pSeries®, RS/6000®, S/30, VM/ESA®, VSE/ESA, WebSphere®, xSeries®, z/OS®, zSeries®, z/VM®, System i, System i5, System p, System p5, System x, System z, System z9®, BladeCenter®

The following are trademarks or registered trademarks of other companies.

Adobe, the Adobe logo, PostScript, and the PostScript logo are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States, and/or other countries.

Cell Broadband Engine is a trademark of Sony Computer Entertainment, Inc. in the United States, other countries, or both and is used under license therefrom.

Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.

Microsoft, Windows, Windows NT, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both.

Intel, Intel logo, Intel Inside, Intel Inside logo, Intel Centrino, Intel Centrino logo, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

ITIL is a registered trademark, and a registered community trademark of the Office of Government Commerce, and is registered in the U.S. Patent and Trademark Office.

IT Infrastructure Library is a registered trademark of the Central Computer and Telecommunications Agency, which is now part of the Office of Government Commerce.

* All other products may be trademarks or registered trademarks of their respective companies.

Notes:

Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.

This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.

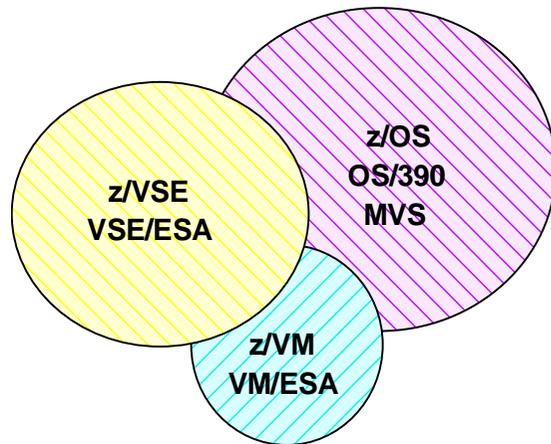

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Information about non-IBM products is obtained from the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.

Operating Systems on IBM System z

§ 33% of worldwide traditional mainframe operating system installs are z/VSE or VSE/ESA

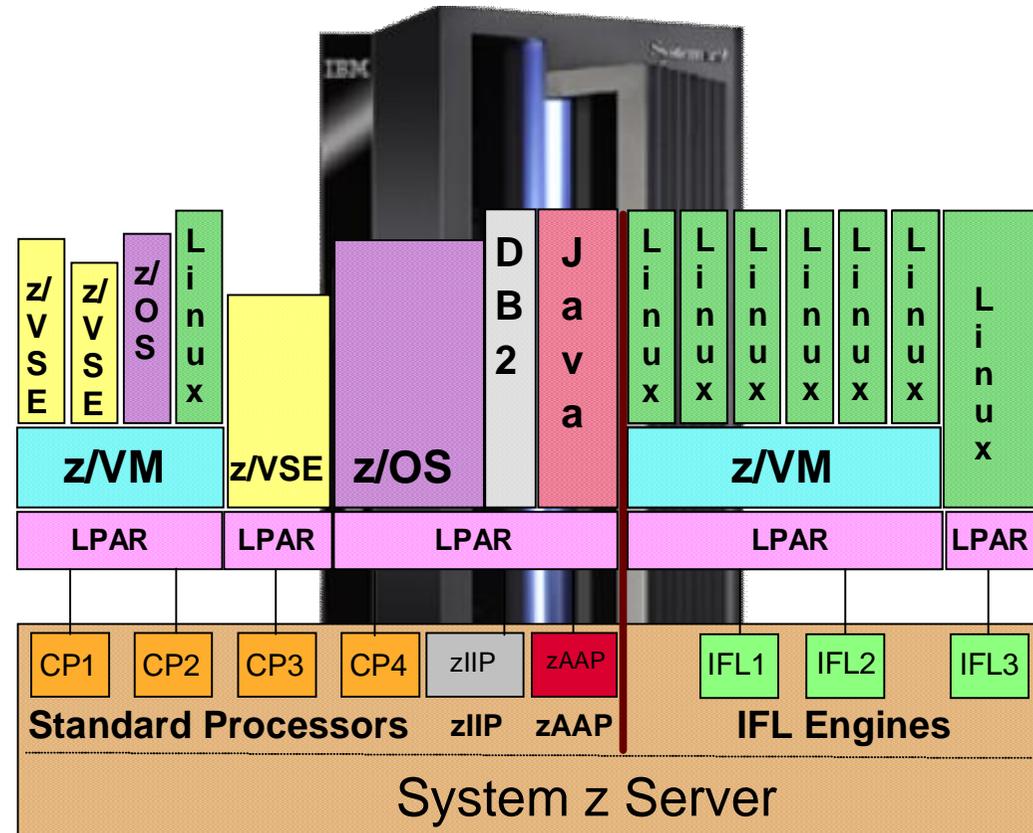

§ VSE* population is 40% in US, 40% in Europe, 20% in RoW

§ Worldwide 50% run VSE under VM, in Europe 90+% are VSE under VM

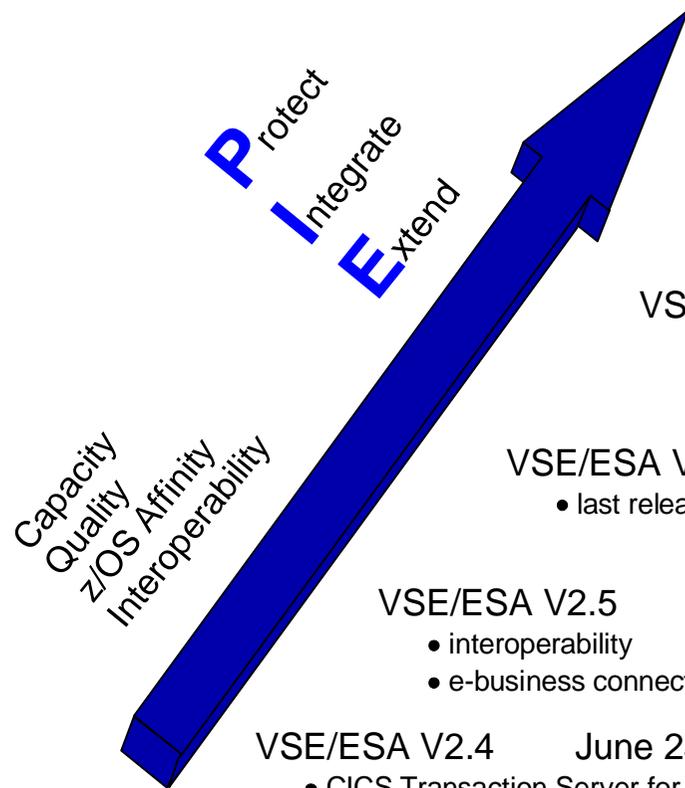

§ IFLs play an important role in VSE's strategy

§ zIIP/zAAP have no meaning to VSE

(*) The term "VSE" stands for both, VSE/ESA and z/VSE.

z/VSE Evolution and its Success Factors

z/VSE V4.2 - Preview Oct 9, 2007

- More tasks, more memory
- EF for z/VSE, SCRT on z/VSE
- SoD for CICS/VSE

Future

z/VSE V4.1 March 16, 2007

- z/Architecture only
- 64-bit real addressing
- MWLC full & sub-cap pricing

Pricing

z/VSE V3.1* March 4, 2005

- zSeries features, FCP/SCSI
- 31-bit mode only

Rebranding

VSE/ESA V2.7 March 14, 2003

- enhanced interoperability
- ALS2 servers only

VSE/ESA V2.6 Dec 14, 2001

- last release to support pre-G5 servers

VSE/ESA V2.5 Sept 29, 2000

- interoperability
- e-business connectors

Strategy

VSE/ESA V2.4 June 25, 1999

- CICS Transaction Server for VSE/ESA
- e-business

Agenda

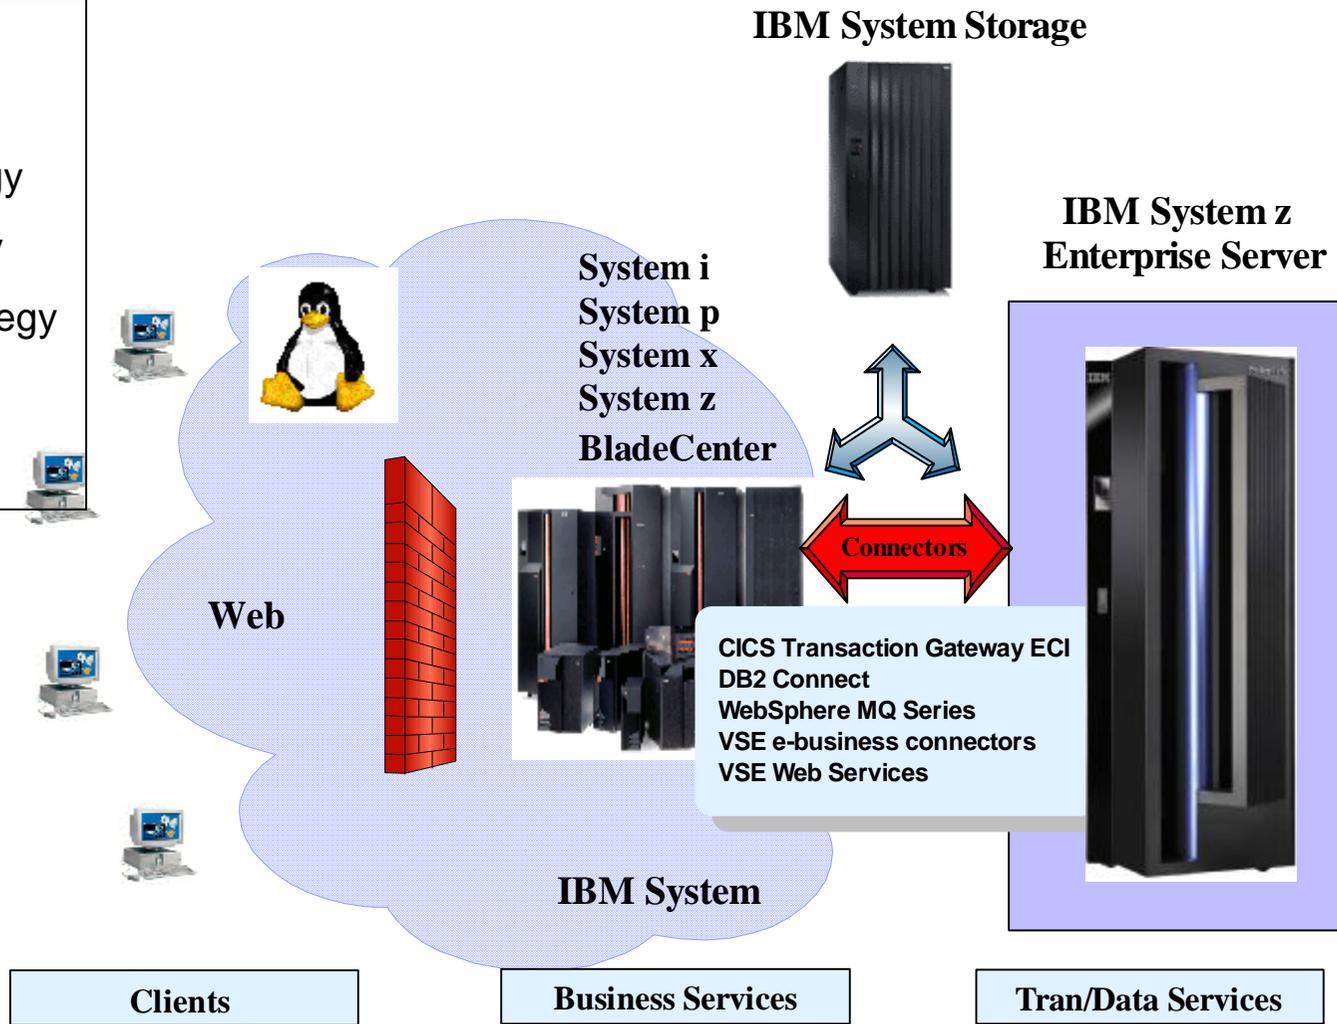

- **1. Strategy**
 - 2. Rebranding**
 - 3. Pricing**
 - 4. Future**
-

- § Connector Strategy
- § Migration Strategy
- § Coexistence Strategy
- § Linux Strategy
- § **PIE Strategy**

z/VSE Strategy with Linux on System z

z/VSE Strategy “easy as P I E”

Protect

existing investment

- § Existing core applications continue to run unchanged
- § Continuous follow-on development for HW and SW
 - from S/390 via zSeries to IBM System z
 - from VSE/ESA to z/VSE
- § z/VSE is the platform of choice for transaction oriented core applications with CICS
- § Excellent support from IBM Lab in Boeblingen & Poughkeepsie
 - z/VSE worldwide development is located in Boeblingen --> deep skills available
 - PoC – Proof of Concept (customer individual)
 - Briefings (customer individual)

Integrate

with IBM middleware using connectors

- § Integration of z/VSE into heterogeneous environments
- § z/VSE is a very stable operating system that can easily be connected to open systems (Linux)
 - access to external data (e.g. on Linux) or programs (e.g. Java) via standard connectors or via free of charge VSE specific connectors
 - exploitation of HiperSockets within the server – no physical network outside the box

Extend

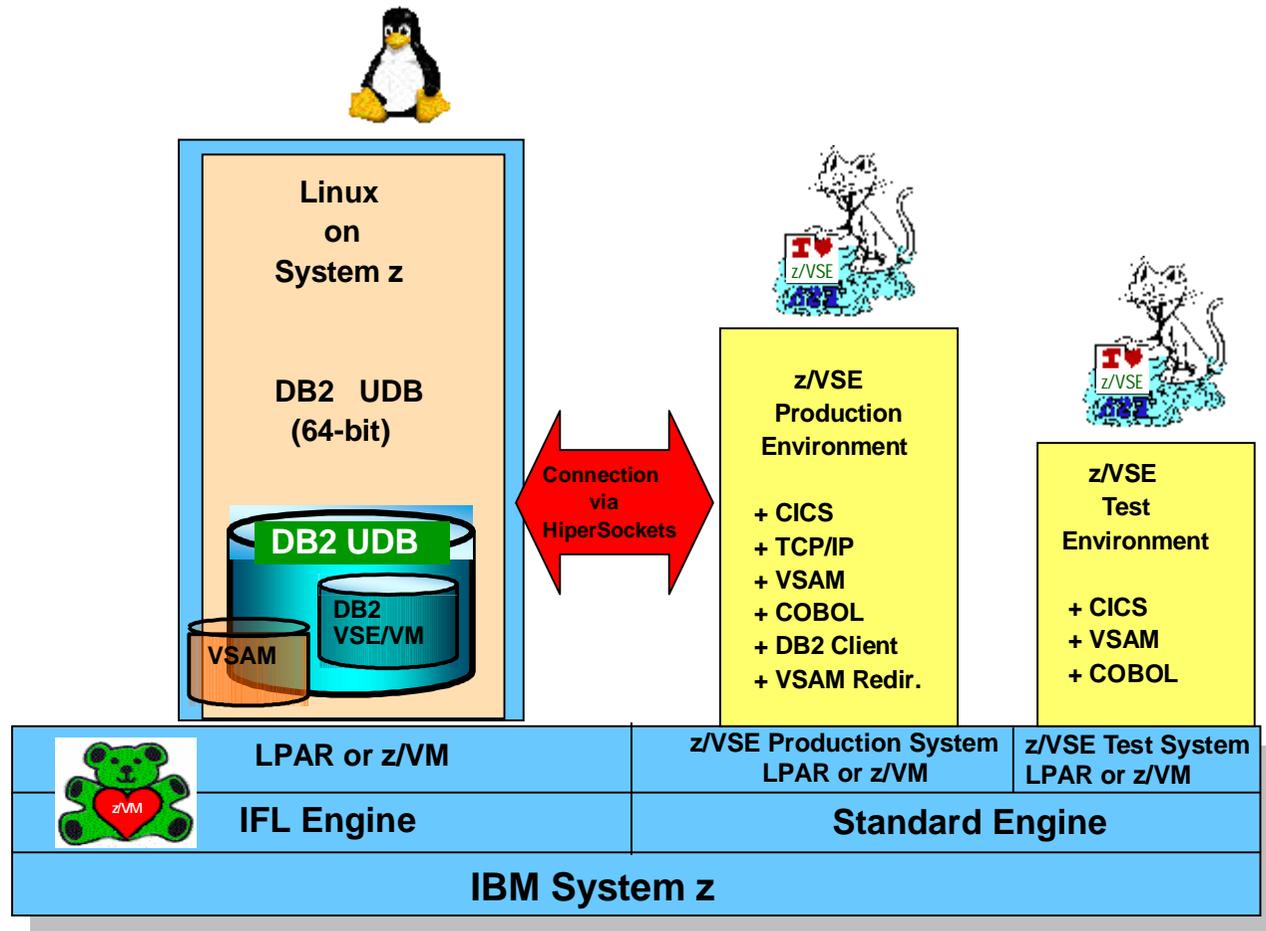

with Linux on System z

- § Extension of existing solutions with Linux on System z
- § Cooperation and coexistence with Linux on System z and z/VM
- § z/VSE is open and connectable to various different client/server platforms

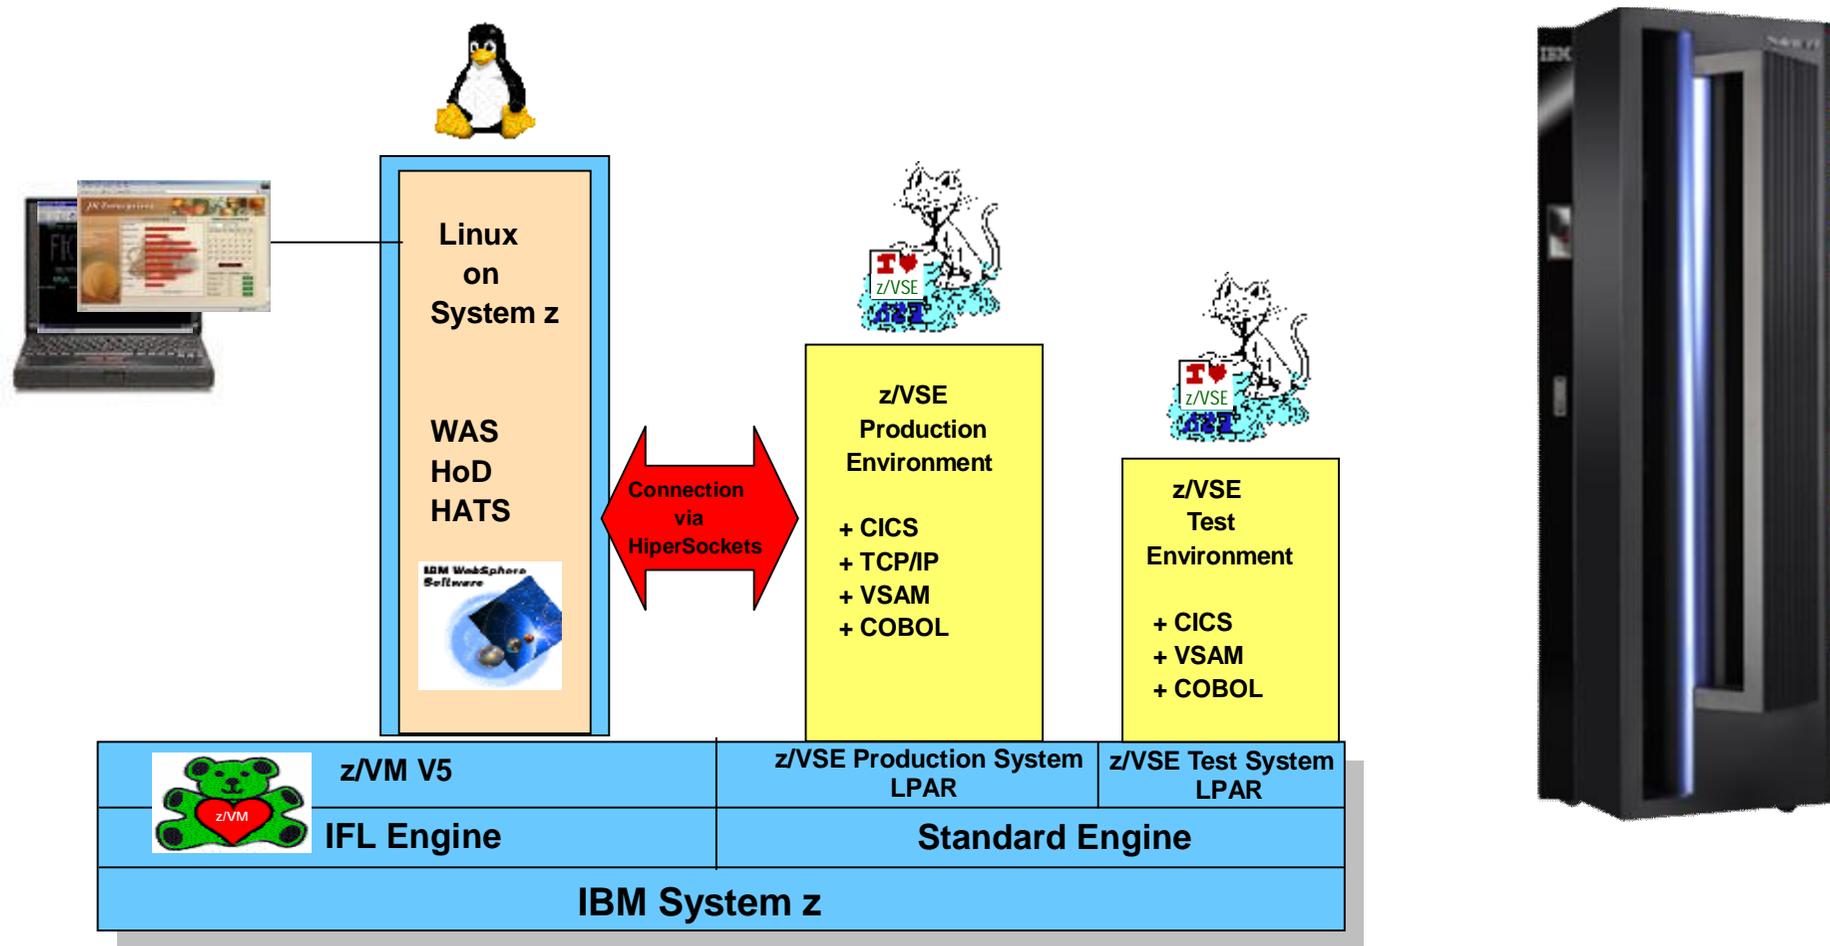

Scenario 1: DB2 LUW for z/VSE Customers

Data consolidation and data warehouse solutions with DB2 UDB on System z

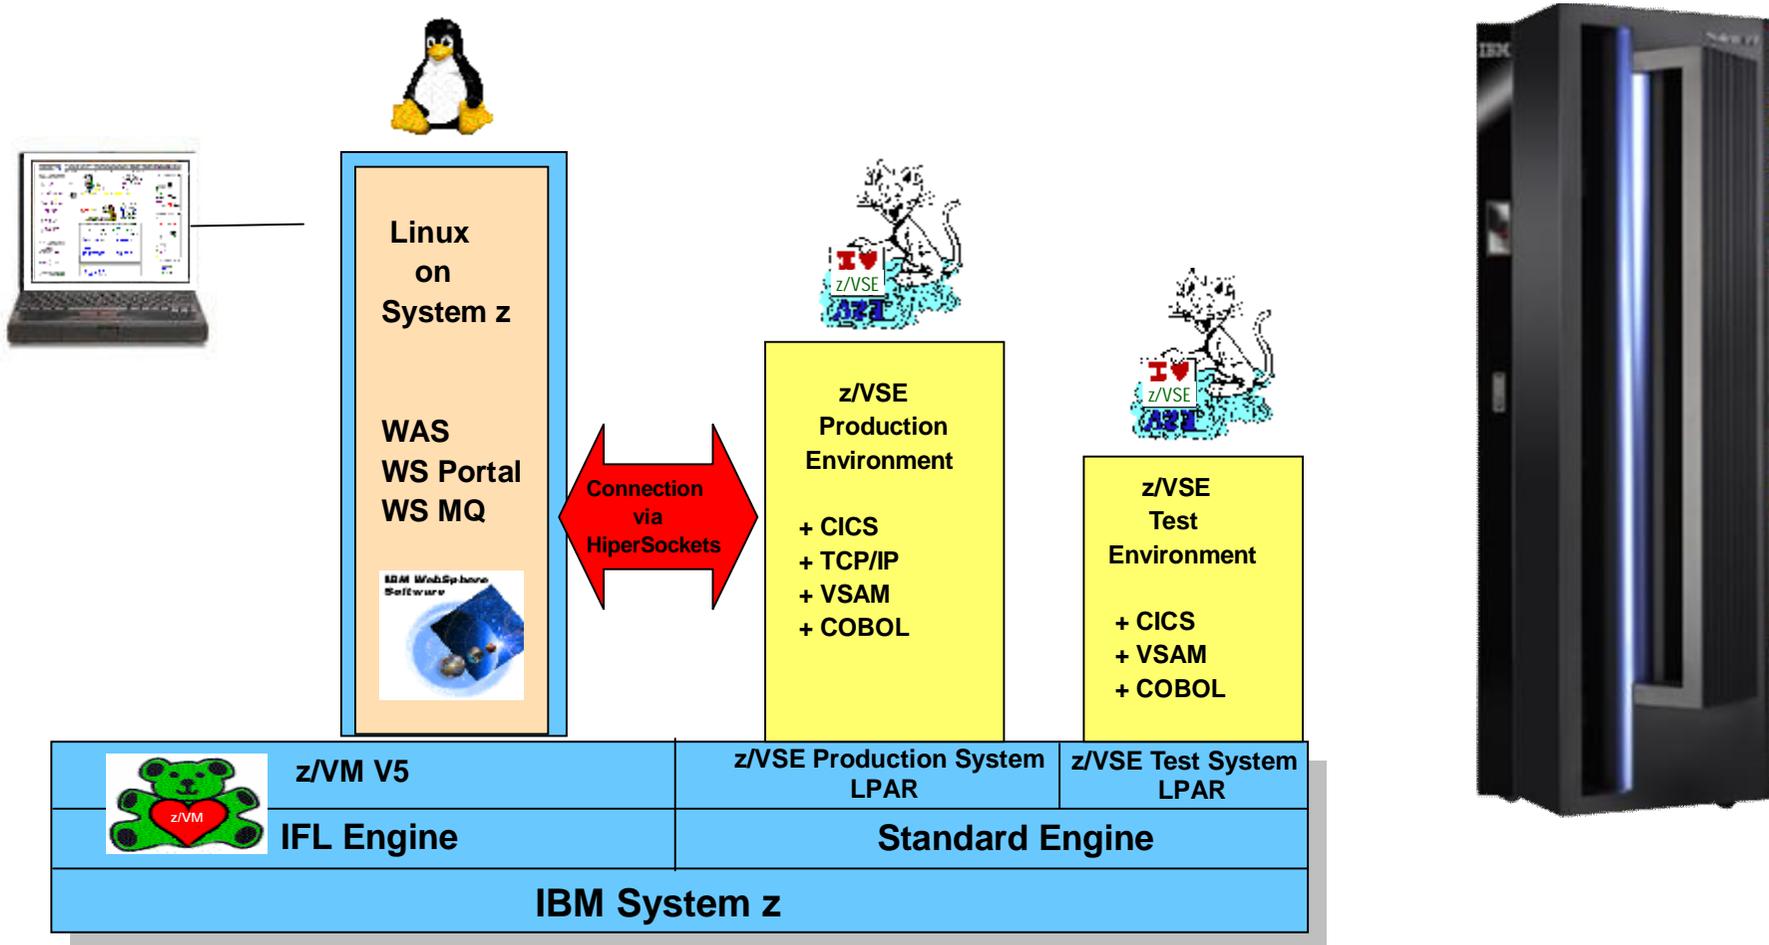

Scenario 2: „Webification“ for z/VSE Applications

Web enable existing applications with Inter/Intranet frontend

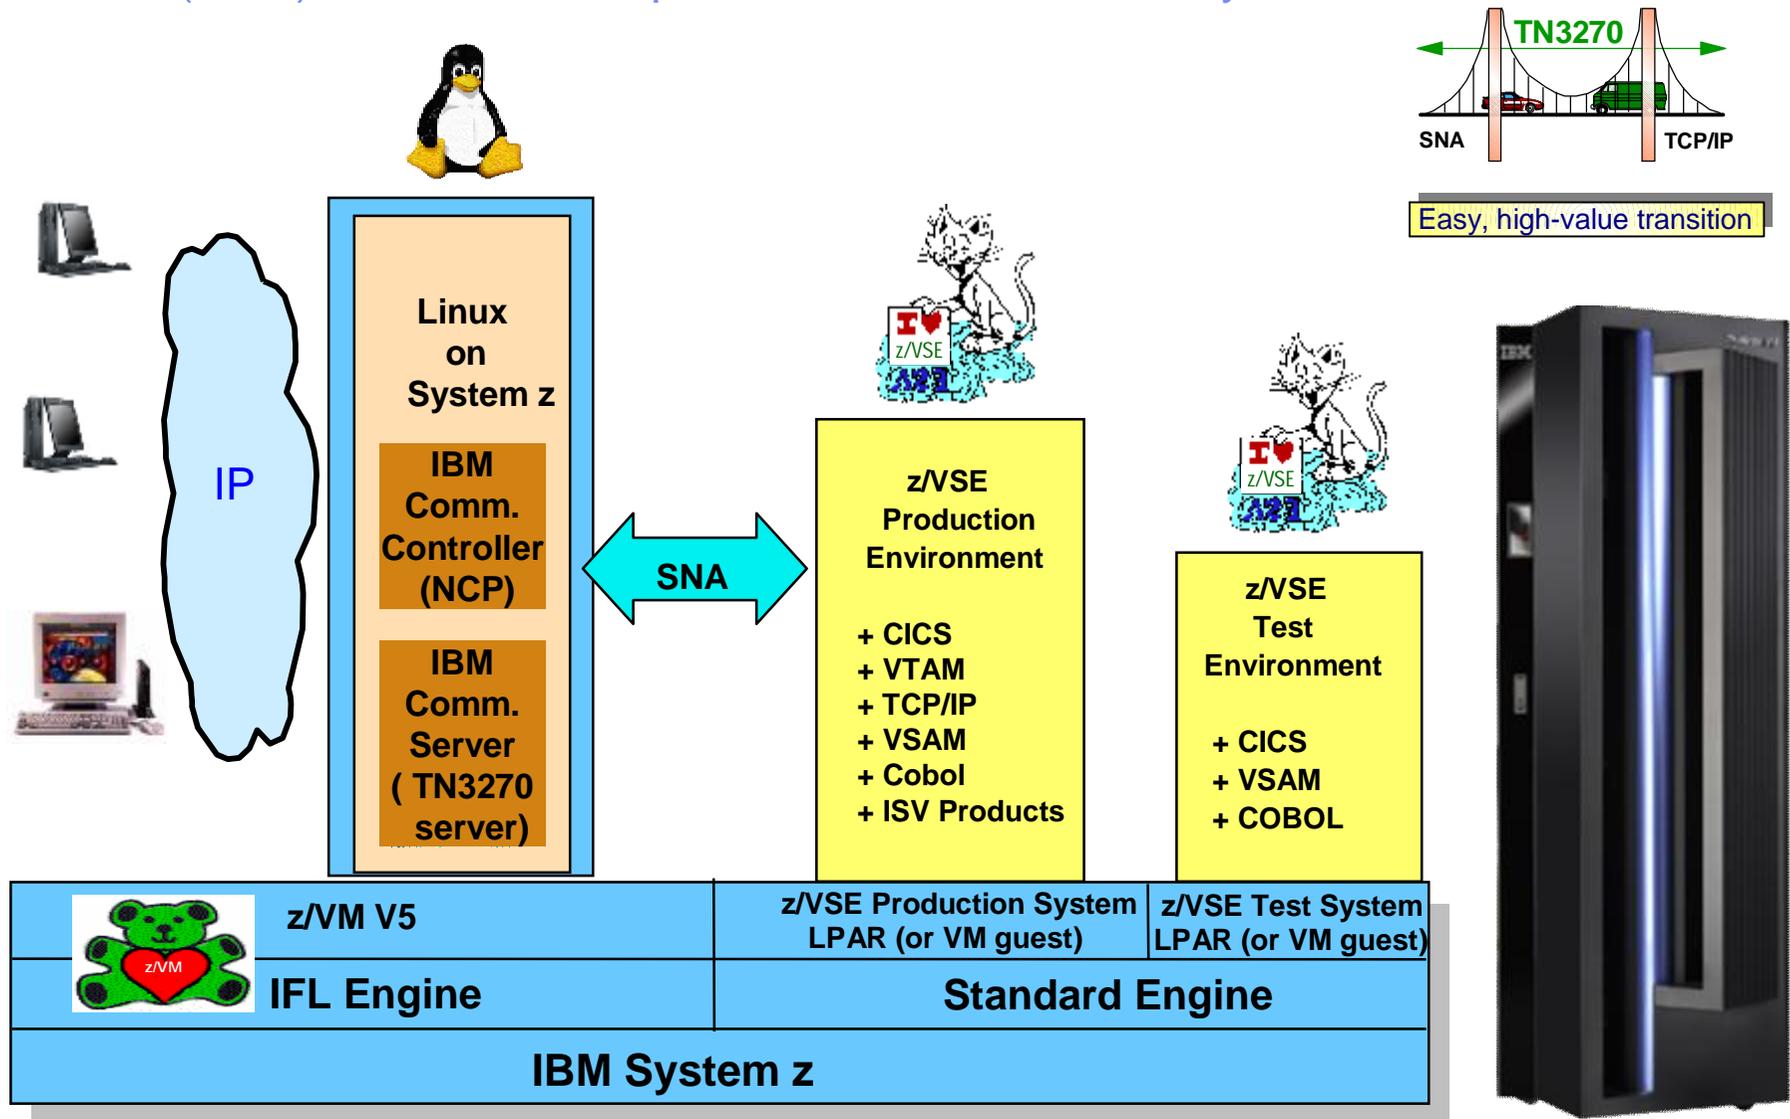

Scenario 3: WebSphere Portal for z/VSE Customers

A portal for administration and integration of employees / customers / providers

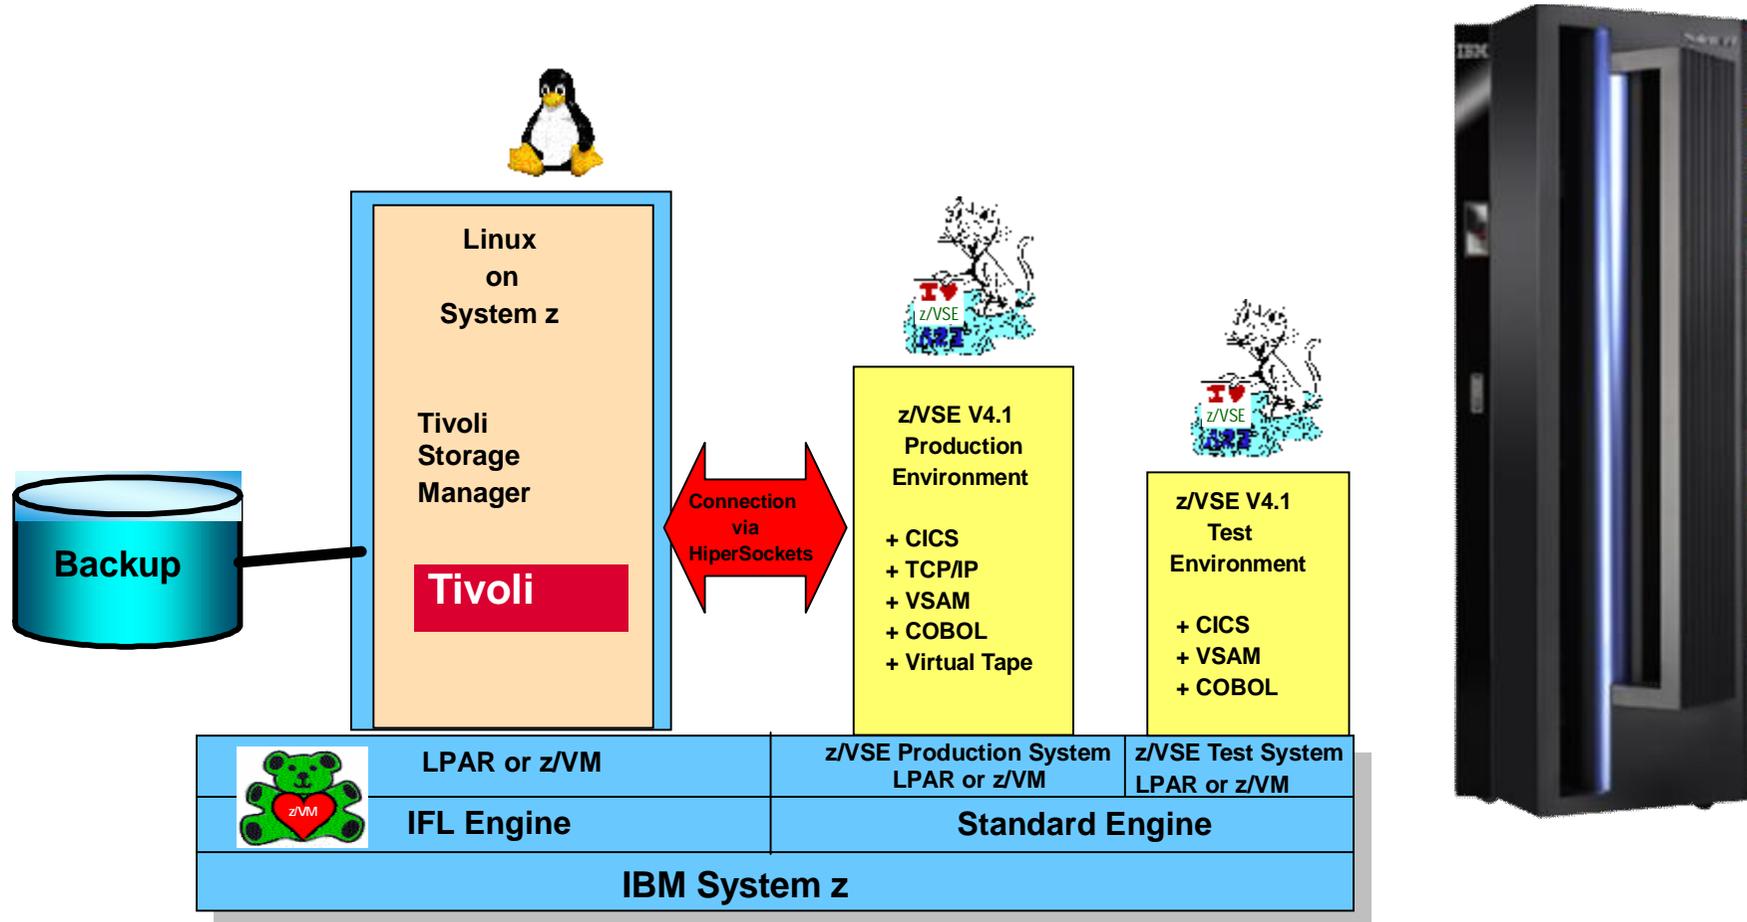

Scenario 4: Network Infrastructure Simplification

3745/46 (NCP) and TN3270 replacement with Linux on System z

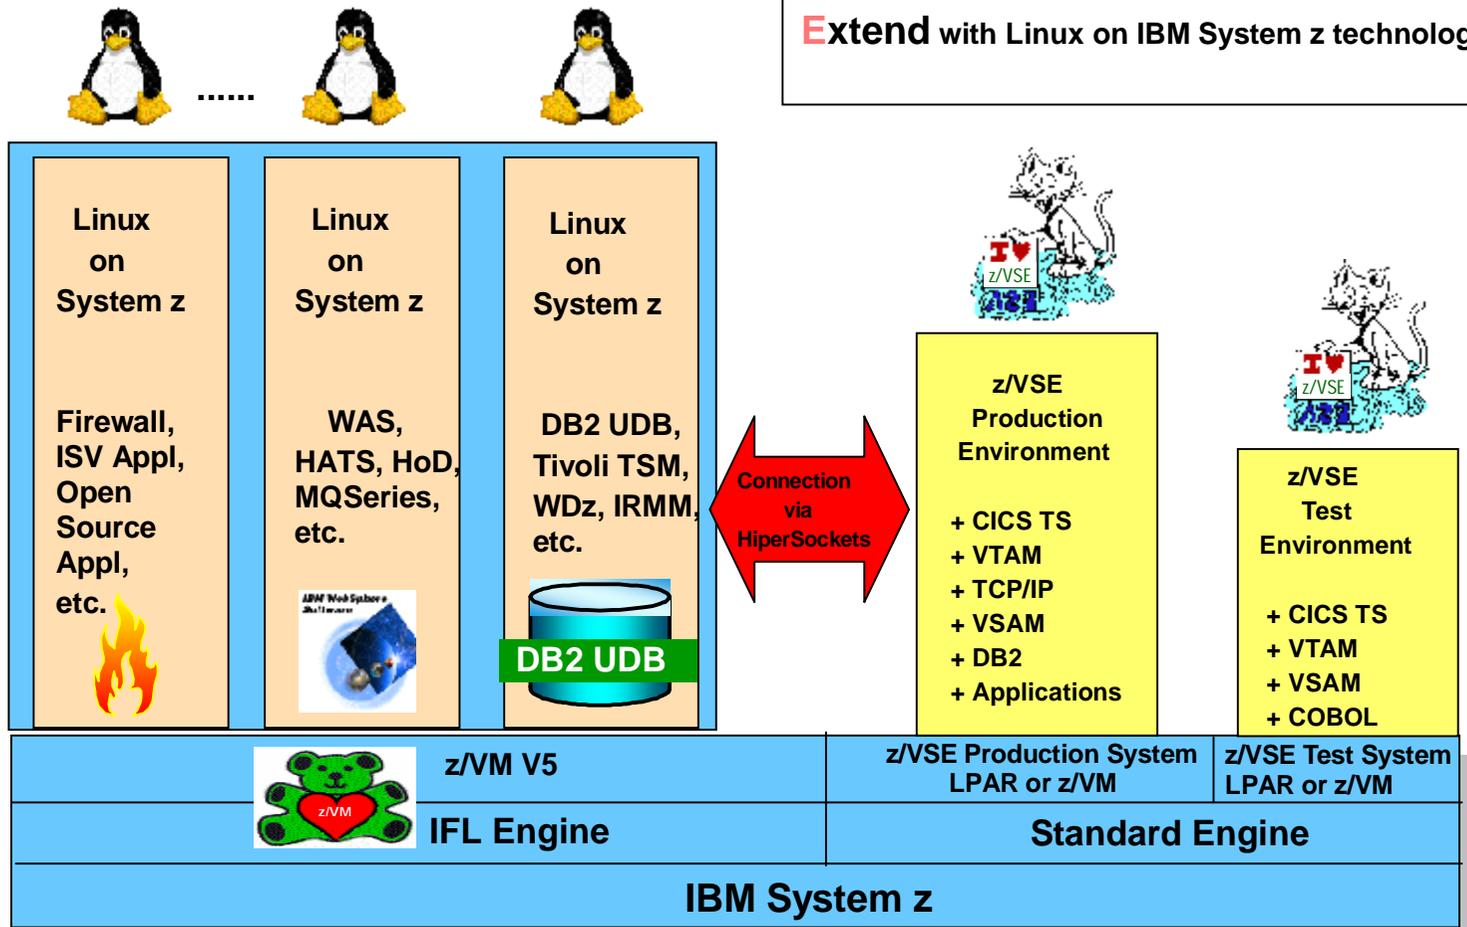

Scenario 5: Backup/Restore Concepts for z/VSE

Integrate z/VSE with TSM on Linux on System z

Summary: z/VSE's **PIE** Strategy w/ Linux on System z

Protect existing VSE investments
Integrate using middleware and VSE connectors
Extend with Linux on IBM System z technology & solutions

Agenda

1. Strategy

2. Rebranding

3. Pricing

4. Future

§ Customer Examples

z/VSE Rebranding and added Functionality

§ Rebranding, reversioning, repricing

- ▶ 3/2005: VSE/ESA Version 2 à z/VSE Version 3 *
- ▶ 3/2007: z/VSE Version 3 à z/VSE Version 4

* z/VSE V3 can operate in 31-bit mode only. It does not implement z/Architecture and specifically does not implement 64-bit mode capabilities. z/VSE V3 is designed to support selected features of IBM System z hardware.

§ Functional enhancements to z/VSE operating system

- ▶ z/Architecture, **64-bit** real addressing, subcapacity, FCP/SCSI, crypto enhancements, more memory, more tasks, more security, etc. etc.

§ Enhancements to z/VSE middleware & tools (few examples only)

- ▶ TCP/IP for VSE
- ▶ VTAM for VSE
- ▶ **DB2 Server for VM and VSE**
- ▶ DL/I
- ▶ WebSphere MQ for VSE
- ▶ **Encryption Facility for VSE**
- ▶ Keyman for VSE
- ▶ SOAP for VSE
- ▶ **VSE Navigator**
- ▶ VSAM Redirector
- ▶ VSE Health Checker
- ▶ CICS2WS
- ▶ IRMM
- ▶ DB2 UDB
- ▶ Tivoli Storage Manager
- ▶ **WebSphere Developer for System z**

Items marked in 'blue' have an additional more detailed slide following this one.

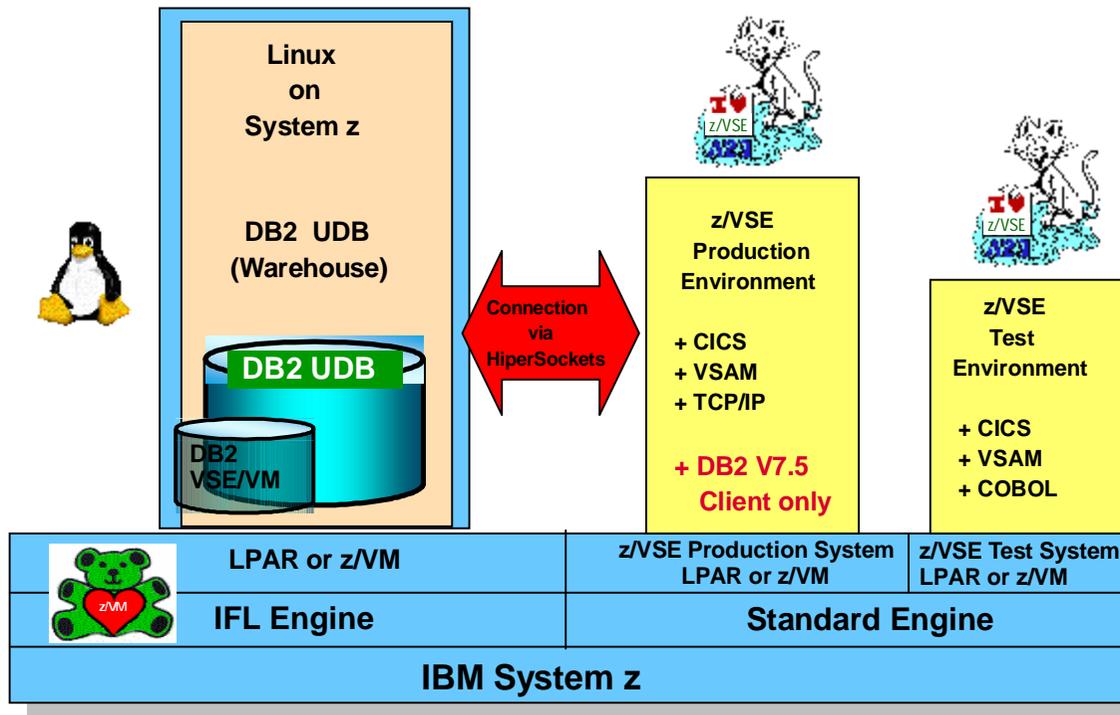

DB2 for z/VSE and z/VM V7.5

§ In the past, DB2 VSE client functionality could be obtained via PRPQ P10154

§ Now, DB2 offers a runtime only client edition for z/VSE and z/VM (no PRPQ required)

§ Plus performance enhancements, e.g.

- ▶ bind file support
- ▶ reduced DRDA code path length
- ▶ and many more ...

Encryption Facility for z/VSE V1.1

§ **Announce:** Oct-09-2007

§ **GA:** Nov-30-2007

§ **Optional priced feature for VSE Central Functions V8**

- ▶ requires z/VSE V4.1 or later
- ▶ MWLC-eligible

§ **Requires CP Assist for Cryptographic Function (CPACF)**

- ▶ no charge feature
- ▶ only on z990, z890, z9 EC, z9 BC, and z10 EC servers

§ **Extends affinity between z/VSE and z/OS**

- ▶ function roughly equivalent to EF for z/OS V1.1
- ▶ compatible with EF for z/OS V1.1 (Encryption Facility System z format)
 - EF for z/VSE tapes can be read by EF for z/VSE, EF for z/OS, EF for z/OS Java Client, and Decryption Client for z/OS
 - EF for z/OS V1.1 and EF for z/OS Java client tapes can be read by EF for z/VSE V1.1

§ **Complements z/VSE support for IBM TS1120 tape**

- ▶ TS1120 preferred solution for high volume backup/archive
- ▶ EF option for limited backup/archive and/or exchange with partners with no TS1120

EF for z/VSE V1.1 (Details)

IBM Encryption Facility for z/VSE V1.1
 Program number: 5686-CF8-40
 Runs on: System z10 EC, z9 EC, z9 BC
 zSeries 890 or 990
 Requires: z/VSE 4.1 (with DY46717) or higher

IBM Encryption Facility for z/OS V1.1
 Program number: 5655-P97
 Runs on: System z10 EC, z9 EC, z9 BC
 zSeries 900 or 990
 zSeries 800 or 890
 Requires: z/OS 1.4 or higher; z/OS.e 1.4 or higher

Optional Priced **z/VSE** Feature*

- § Supports encrypting, decrypting, and **compression** of data at rest (tapes, disk).
- § Supports either Public Key/Private keys or passwords to create highly-secure exchange between partners.
- § **Can** use z/OS Java Client or Decryption Client for z/OS for data exchange with client systems or decryption on z/OS.
- § Use zvse@de.ibm.com mailbox for questions about z/OS Java Client and Decryption Client for z/OS when used in conjunction with z/VSE.

Java Client
Web Downloadable

Java technology-based code that allows client systems (z/OS and non-z/OS) to decrypt and encrypt data for exchange with z/OS **and z/VSE** systems.

Decryption Client for z/OS
Web Downloadable

Decryption only code designed to run on z/OS systems. Can process data encrypted and compressed or just encrypted by the Encryption Facility for z/OS **or Encryption Facility for z/VSE**.

Feature: Encryption Services

Optional Priced Feature*

- § Supports encrypting and decrypting of data at rest (tapes, disk)
- § Supports either Public Key/Private keys or passwords to create highly-secure exchange between partners

Feature: DFSMSdss Encryption

Optional Priced Feature*

•Variable Workload License Charges (VWLC, **MWLC**), Entry Workload License Charges (EWLC), zSeries Entry License Charges™ (zELC), Parallel Sysplex® License Charges (PSLC) **Statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Application Development for z/VSE and the Enterprise

Modern Appl Dev with Eclipse and WebSphere Developer for System z

IBM WebSphere Developer (WDz) in z/VSE Perspective

The screenshot shows the IBM Rational Software Development Platform (RSDP) interface for z/VSE. The main window displays the source code for a program named PRINTAPP.dbl. The code is organized into sections: Identification Division, Data Division, Working-Storage Section, Linkage Section, and Procedure Division. The Procedure Division contains several paragraphs of code, including a loop to process input names and a display statement. The interface includes a menu bar, a toolbar, and several panels:

- 1.Perspective:** The top toolbar and menu bar.
- 2.View:** The VSE System View panel on the right, showing a tree structure of system components like VSE Lab, VSE Workshop, and various datasets.
- 3.Projects:** The z/OS Projects panel on the left, showing a tree of project files like .link, .project, and PRINTAPP.dbl.
- 4.Editor:** The central text editor window showing the source code.
- 5.Outline View:** The Outline panel at the bottom left, providing a hierarchical view of the code structure.
- 6.VSE Console:** The VSE Console panel at the bottom, displaying a MAP (Memory Address Page) table with columns for AR, SPACE, AREA, V-SIZE, GETVIS, V-ADDR, and UNUSED NAME.

AR	SPACE	AREA	V-SIZE	GETVIS	V-ADDR	UNUSED	NAME

Agenda

1. Strategy

2. Rebranding

→ 3. Pricing

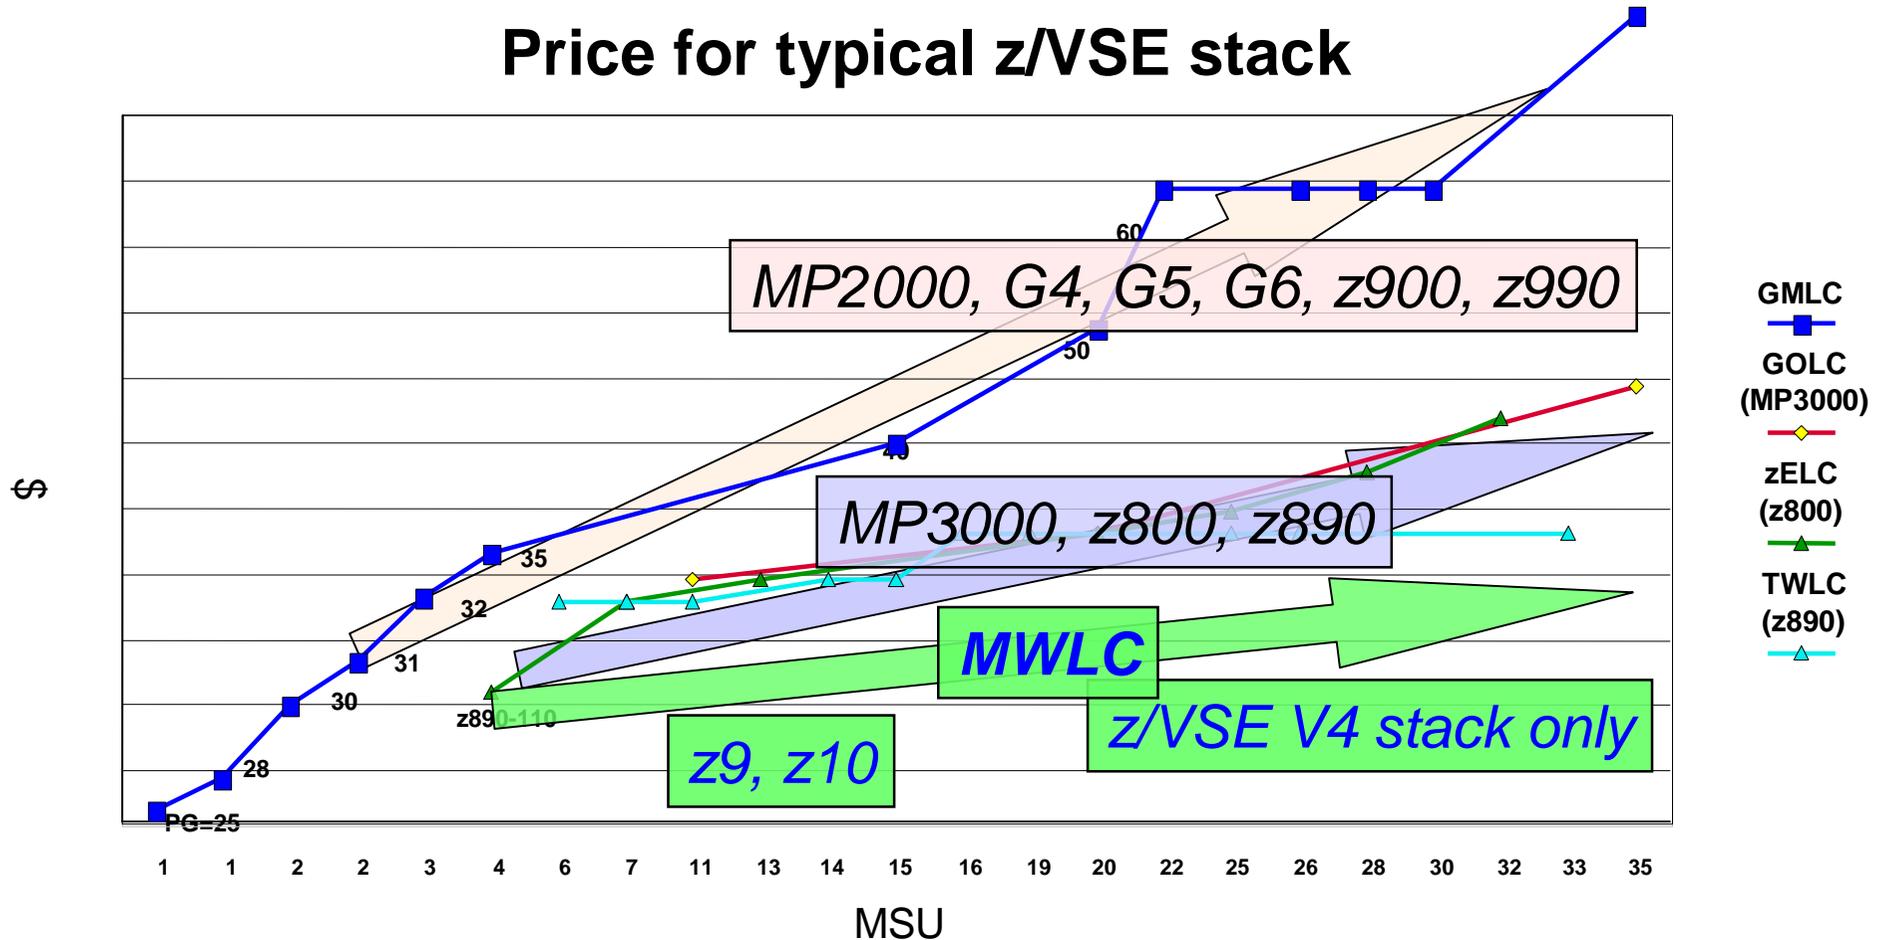

4. Future

§ Customer Examples

MWLC – Midrange Workload License Charge

Price for typical z/VSE stack

§ “I just got our April software bill from IBM for the first month on our z9 under z/VSE 4.1 and MWLC. We were paying \$22,965 per month on our z800 under z/VSE 3.1.2. The April bill is for the same software and it is \$12,318: a difference of \$10,647 per month.”
Mike Moore, IT Manager, Alabama Judicial Datacenter, Alabama

Transition to z/VSE V4 MWLC Pricing

§ Basic Requirements

- ▶ IBM System z10 EC, z9 EC or z9 BC (exception: z9 BC A01 is priced zELC)
- ▶ z/VSE V4
- ▶ If running under VM: z/VM 5.2 (or later) is required

Very simple !

§ The resulting savings can – and should – be used to invest in new solutions, e.g.

- ▶ SOA
- ▶ Linux on System z
- ▶ new middleware
- ▶ new standard software
- ▶ new application development
- ▶ new projects with IBM

Transition to z/VSE V4 MWLC Sub-Capacity Pricing

§ Basic Requirements

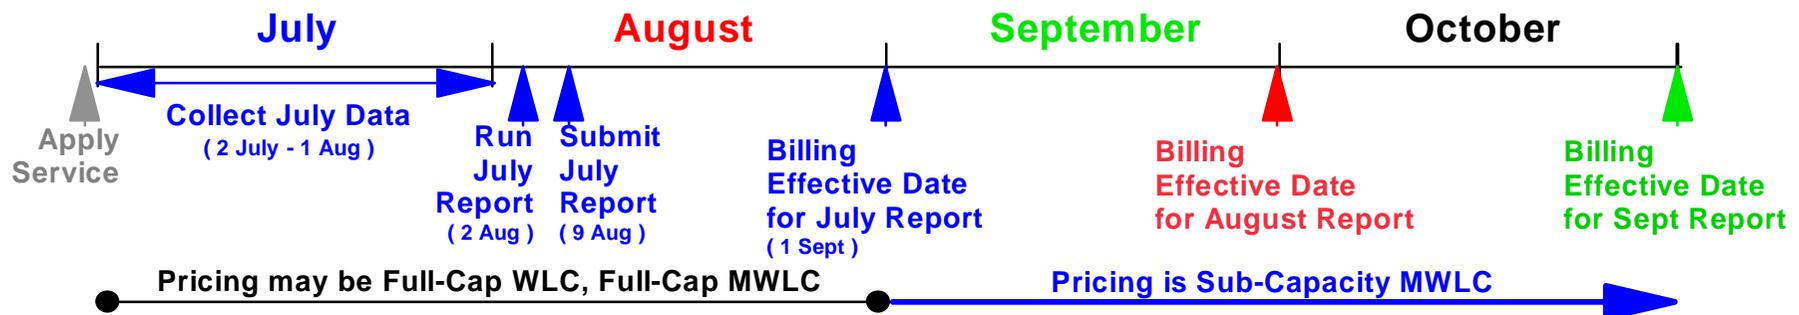

- ▶ IBM System z10 EC, z9 EC or z9 BC (exception: z9 BC A01 is priced zELC)
- ▶ z/VSE V4 (no older VSE version allowed on the processor, i.e. no VSE/ESA V2, no z/VSE V3)
- ▶ If running under VM: z/VM 5.2 (or later) is required

§ Reporting Requirements

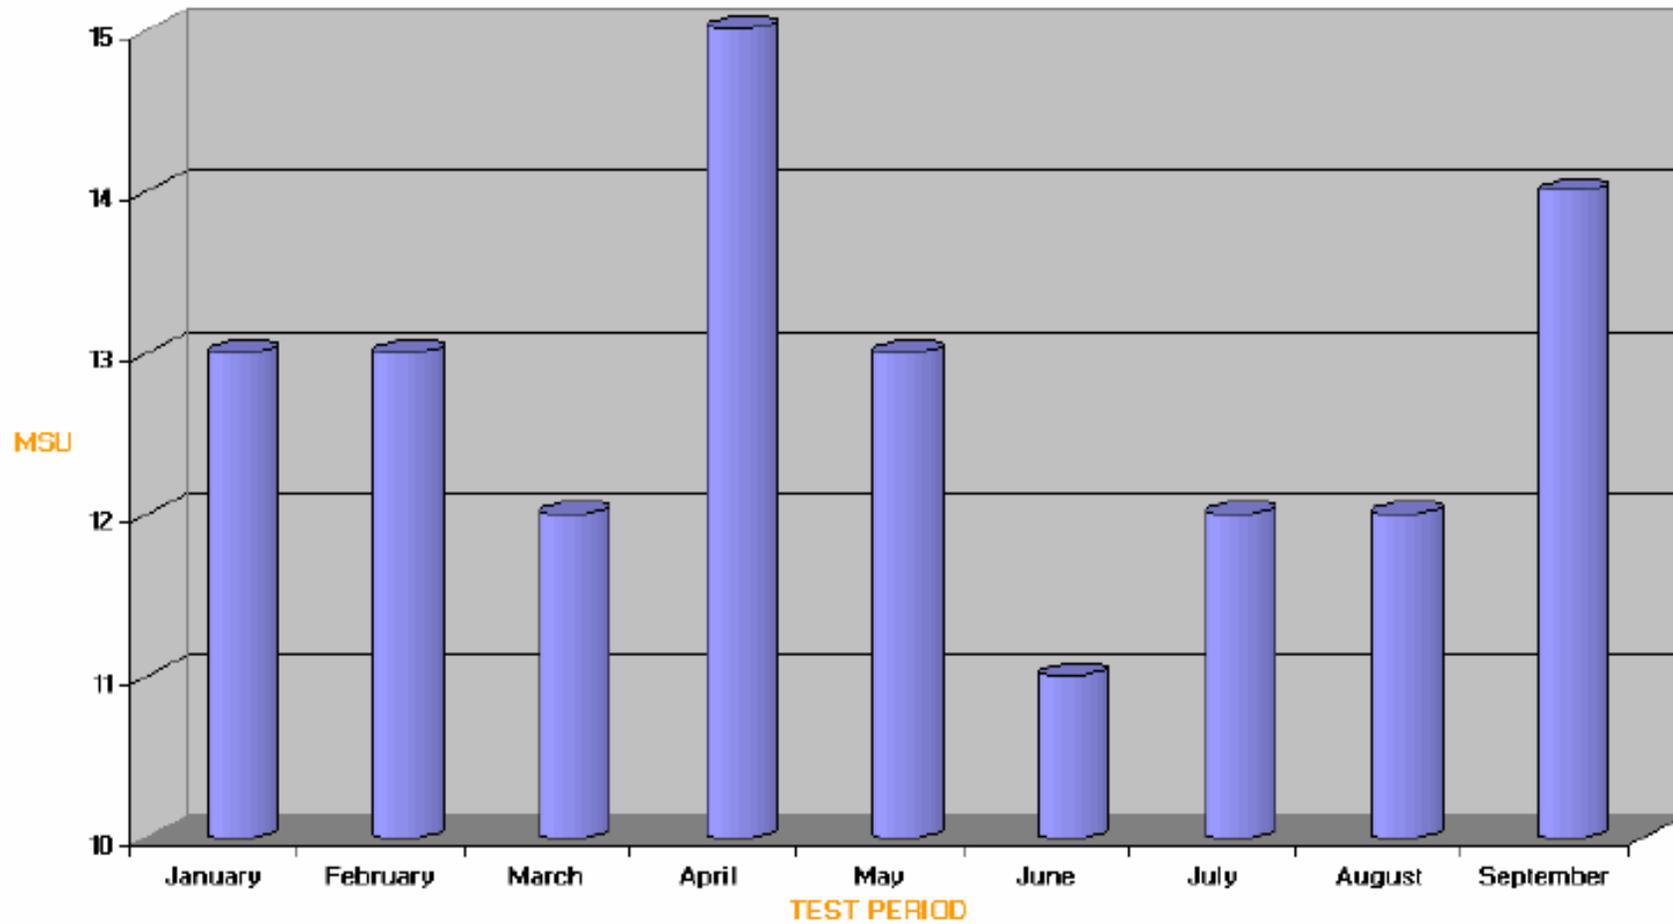

- ▶ Must report on all LPARs and z/VM guests (production, test, development, etc.)
- ▶ 95% data collection
- ▶ Default (i.e. worst case) is full-capacity prices
- ▶ 2-month full-capacity transition period

§ Timing Requirements

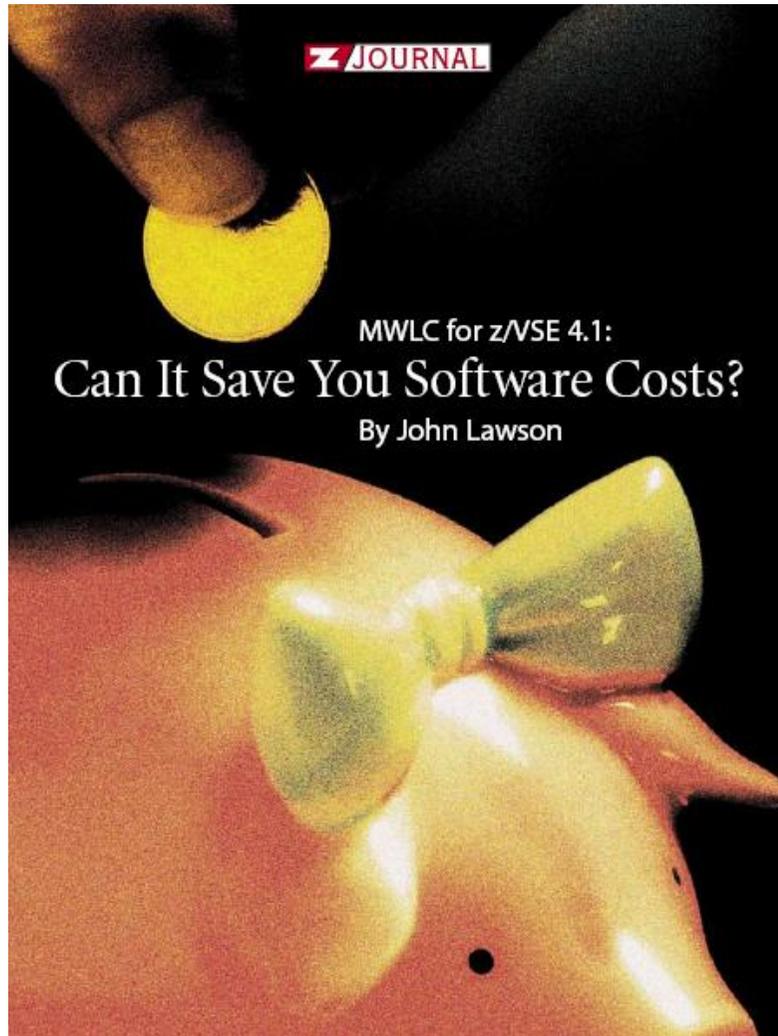

- ▶ Sub-Capacity Pricing begins with the submission of 1st full month report
- ▶ Data **collection** period: 2nd of the previous month - 1st of the current month
- ▶ Data **submission** period: 2nd - 9th following data collection

Sub-Capacity Example Report

Press & Analyst Papers

Source: z/Journal, April / May 2007

VSE users receive an offer they can't refuse

Most of the activity in the IBM mainframe world not surprisingly focuses on the z/OS environment, but there is still a sizeable population of users running systems based on VSE, often in conjunction with the VM hypervisor.

Many of these sites are slow growers with limited in-house technical skills and a reluctance to upgrade their hardware or software even in exchange for significant cost savings. As a result their relationship with IBM (and with other ISVs supporting their applications) is a difficult one.

In its recent announcement of z/VSE 4.1, IBM has shown some of the 'carrot and stick' tactics that often characterize its product developments in this part of the market.

The latest version of the operating system offers many attractions for small mainframe users, including some important enhancements to SOA/web service support and tape encryption. Moreover the software is accompanied by a new pricing scheme (Midrange Workload License Charge), which can bring sub-capacity benefits and very significant savings to VSE users. But to get the savings they need to upgrade to a z9 BC or EC.

Even for VSE users, it is becoming increasingly difficult to make a cost case for avoiding an upgrade to the latest hardware, and the months ahead are likely to witness a steady stream of VSE-base upgrades to the z9 BC.

IBM Continues the Evolution of Its z/VSE Mainframe Operating System

October 19, 2007: 08:01 AM EST

IBM (NYSE: IBM) today announced that the z/VSE mainframe operating system is being updated to help address customer needs for scalability, security and integration. z/VSE V4.2 is designed to support growing mainframe applications and drive stronger investment protection.

"Many customers are beginning to put new Linux applications on the same IBM System z9 mainframe that also runs their production z/VSE applications. This integrated approach is designed to offer the best of Linux, the robust data serving capabilities of z/VSE, and the potential for low total cost of ownership of the System z9 mainframe," said Dr. Klaus Goebel, Development Executive Project Manager and z/VSE PDT Leader. "IBM's powerful mainframe virtualization system, z/VM, is fundamental to these integrated environments. It helps customers get the most from their Linux and z/VSE applications, integrate their business, and support business growth."

Previewed at a special international meeting of the GUIDE SHARE EUROPE (GSE) mainframe user group earlier this week, z/VSE enhancements include a range of new features, especially important to modern applications, such as on-line commerce. Capabilities include:

-- More z/VSE tasks and more real storage designed to improve scalability

- and many more, e.g.**

z/VSE and z/VM Customer Conferences in 2008

§ **GSE German Working Group in Bonn (Germany), April 7-9, 2008**

- ▶ Approx 100 attendees, German speaking audience

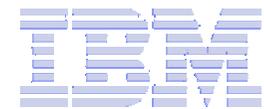

§ **WAVV in Chattanooga (Tennessee), April 18-22, 2008**

- ▶ Approx 250 attendees, mainly from the US
- ▶ This is the prime conference for VM/VSE and Linux within AG

§ **European IBM System z Technical Conf. in Dresden (Germany), May 5-9, 2008**

- ▶ Approx 500 attendees, mainly from Europe, thereof approx 80-100 for VM and VSE

§ **IBM System z EXPO in Las Vegas (Nevada), Oct 13-17, 2008**

- ▶ Expect approx 1000 attendees, worldwide, thereof approx 100-200 for VM and VSE

§ **GSE European Working Group in Leipzig (Germany), Oct 27-29, 2008**

- ▶ Expect approx 200+ attendees, mainly from Europe
- ▶ This is going to become the prime conference on VM/VSE and Linux within Europe

§ **German IT Manager Summit in Bad Reichenhall (Germany), Nov 27-28, 2008**

- ▶ Expect approx 70-80 attendees, German speaking decision makers

z/VSE Live Virtual Classes in 2007/08

- § z/VSE V4 and MWLC Announcement Overview
- § Midrange Workload License Charges (MWLC)
- § z/VSE V4.1 Solutions based on SOA and DB2
- § z/VSE Security
- § z/VSE V4.1 User Experience
- § IBM System z Hardware
- § New VSAM Tools
- § Bringing You up to Date with z/VSE V4
- § z/VSE Wellness
- § Encryption Facility for z/VSE
- § DB2 for z/VM and z/VSE V7.5
- § Modern Application Development for z/VSE
- § Live Demo of WebSphere Developer for System z

§ + more planned ...

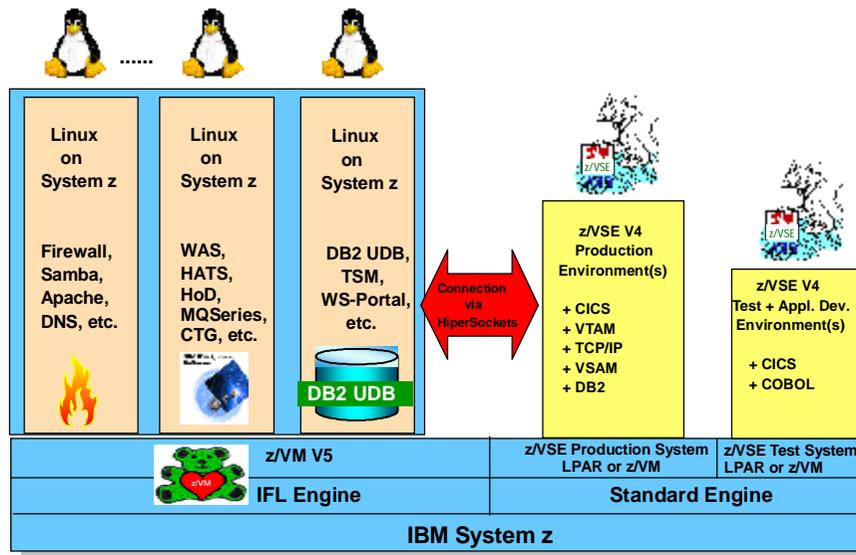

§ typically set for Thursday, 5:00 – 6:00 pm

Note: Charts are available on the z/VSE web site the day following each call. Replay available approximately one week later. For more information, please see the z/VSE web site at:

<http://www-03.ibm.com/servers/eserver/zseries/zvse/>

Summary: Exploiting the Best of all Worlds with System z, z/VM, z/VSE, Linux, System Storage, and IBM Middleware

§ z/VSE V4

- ▶ Protect core IT investments thru PIE
- ▶ Robust, secure enterprise server
- ▶ Cost-effective solutions
- ▶ Interoperability with network / servers
- ▶ Highly improved price / performance

§ z/VM V5

- ▶ Highly flexible, industrial strength
- ▶ Advanced virtualization
- ▶ Multiple z/VSE and Linux images
- ▶ Designed to exploit System z9

§ Linux on System z

- ▶ Large portfolio of new applications
- ▶ Platform for IBM middleware
- ▶ Infrastructure Simplification
- ▶ Massive scalability / consolidation

Questions ?

Feel free to contact the z/VSE team in the Lab in Boeblingen via:

tmcc@de.ibm.com
boebc@de.ibm.com
zvse@de.ibm.com

- for technical sales support
- for briefings and proof of concept
- for z/VSE consulting and Q&A
